

Joint contour: $\Delta\mathbf{a}^T K^{-1} \Delta\mathbf{a} = \chi^2_{2,\,0.95} = 5.991$; equal axis scales.

Model-based approximation; fit diagnostics: LS $\chi^2/\nu = 11.51$; Poisson ML $D/\nu = 11.69$ ($\nu = 4$).

Configured systematics: 0.1% efficiencies and 0.1% volume; covariance not inflated by fit statistic.
